

Oil and Gas Technician, BiSN

Location: Houston, TX

Job Type: Full-time

About Us

BiSN Oil Tools provides Downhole Sealing Solution to the Oil and Gas Industry. The company develops downhole tools for various sealing applications in P&A, through tubing intervention, water & gas management and drilling & completions.

We are now seeking to hire a technician to work in our Houston facility.

Job Overview

The Technician will support a Lead Technician in the areas of assembling and testing BiSN tools. BiSN is looking for someone with oil and gas testing experience (pressure testing, component testing). Mechanical aptitude and detail oriented.

Duties:

- Data acquisition (using thermocouples, and pressure sensors).
- Perform all mechanical and assembly operation using hand tools and torque machines.
- Carry out hydro, gas, and pressure testing upon completion of assembly.
- Comprehension of general layout of plan drawings.
- Take responsibility for planning own work to meet production and schedule requirements.
- Troubleshoot and conduct root cause analysis.
- Complete JSA's and HIR to company standards.
- Keep clean equipment and work areas.
- Contributes to the workplace improvement in terms of HSE and 5s.

Other important skills include:

- Strong HSE ethics.
- Self-starter and self-motivated, ability to mentor other less senior technicians.
- Proficient with computers and Microsoft office.
- Ability to work in a dynamic team environment.
- Excellent organizational and verbal/written communication skills.
